# Lanzarote

## ISLAND CROSSING FROM WEST TO EAST.

Lanzarote is unique. Elemental forces of volcanoes, creativity of mankind and the fantasy of the famous architect and landscape artist César Manrique have caused this island to become a fascinating holiday destination. Enormous eruptions have formed over 300 volcanic cones on Lanzarote and have even increased the size of the 'Fire Island' considerably. Particularly impressive is the play of colour of the volcanic cones in the evening sun. However very few only know, that in this since 1993 recognized biosphere reserve hiking paths were created in this barren landscape, which are hardly used and allow the hiker a very distinct view onto the island and reveal the simple beauty of Canarian architecture contrasting with the black mountains of the island. In addition outstanding wine is grown in the area of La Geria on Lanzarote. Discover this exceptional Canary Island whilst hiking and allow yourself to be enchanted. Here you find out more about our [Eurohike hiking holidays on the Canary Islands](#).

## *Yaiza – San Bartolomé*

You hike to the traditional village of Uga, where Arabian camels are still bred to this day, after that you proceed into the very lauded wine-growing region of the island, where the countless craters on the ‚Picón‘ (volcanic ash fields up to a size of 2.5 m) enable a very special way of viticulture. Volcanic rocks arranged in a semi-circle protect the vines from the wind and the layers of lapilli accumulate water perfectly. Should the opportunity arise, we highly recommend you do not miss out on sampling local wines.
